

The Leading Ones

# Generator RL/RLH

**Ultrasonic welding generator 35 kHz / 20 kHz**

The ultrasonic welding generator RL is suitable for the operation of the ultrasonic welding machine MP2021, as well as for the relevant oscillator systems.

- RLH with TIM5 controller for increased power
- Easy to program
- Multitrack for the synchronous operation of several modules optionally available
- Separate item counter for RLH

## Specification RL/RLH

Operating frequency:	<b>35 kHz / 20 kHz</b>	
Maximum power output:	<b>RL35:</b>	250 / 400 / 600 / 900 W
	<b>RL20:</b>	1500 W
	<b>RLH20:</b>	3000 W
Power supplies:	± 10%:	230 V, 50 / 60 Hz 200 V, 50 / 60 Hz 110 V, 50 / 60 Hz (only for 250 / 400 / 600 W)
Operating modes:	Time dependant, Contact cut-off	
Data input:	With encoder keys	
Dimensions WxHxD:	<b>RL:</b>	130 x 300 x 450 mm
	<b>RLH:</b>	260 x 300 x 450 mm
Weight:	<b>RL:</b>	7 kg
	<b>RLH:</b>	16 kg
